The Need

There are many young Latino children in our community who lack the means to participate fully in various advanced athletic enrichment programs due to insufficient economic means. While there are a number of admirable programs that fund the inclusion of underprivileged children in various sports and athletic program, few if any can sustain the support past basic inclusion. This means that sports, such as soccer, may be accessible at a recreational level, but there are few opportunities for many youth players to continue to develop as athletes past the elementary level, developing the personal discipline, team competitiveness, and overall leadership skills that will assist them in school, work, and life as high performing contributors to society.

The Opportunity

The Latino Sports Outreach (LSO) was founded to make modest investments of time and money into assisting the many high potential Latino athletes realize their full potential with the expectation that the return on this investment will accrue to all of us. Specifically, LSO sponsors gifted Latino children who qualify for competitive athletic programs but cannot afford to participate. Many of these sports at the youth levels are generally restricted to the affluent families in our communities.

The Goal

Latino Sports Outreach is committed to helping children of low and moderate-income parents play competitive sports, and to develop into good people. We sponsor kids in exchange for a commitment that they apply themselves on the field as well as in the classroom.

Your sponsorship will go directly towards the costs of participation in high-level athletic programs, such as uniforms, monthly team fees, and tournament fees. Without your help, these kids simply could not afford to participate.

Our goal is to bring young people into the program with the expectation of enabling their participation for several years, not just one season. This will provide them the stability and long-term benefits of high-level competitive sports. We would like to be able to allow these kids the ability to participate and develop into the athletes and people commensurate with their ability, desire, and drive.
